

IN THE CLAIMS:

Please cancel Claims 2, 5, 11, 14 - 17, 18.

Please amend the Claims as follows:

1 (Amended). An improved telescoping stun gun comprising:

- a. a handle comprising a power source electrically connected to a voltage step-up circuit having an output of stepped-up voltage relative to the power source;
- b. a first tube section having a base section and a distal end, said base section being connected to the handle;
- c. at least one additional tube section having a proximal end and a distal end and being disposed within the first tube section, ~~and having a connection means to connect to the first tube section,~~ said distal end comprising [an] a conductive probe electrically connected to the output of the step-up circuit, said probe for delivering a high-voltage shock, said proximal end of said at least one additional tube section having a diameter that is larger than the diameter of the distal end of the first tube section;
- d. deployment means to extend said at least one additional tube section from its position as being disposed within the first tube section to an extended position whereby ~~the connection means connects~~ when in its extended position, the proximal end of the at least one additional tube section frictionally connects to the distal end of the first tube section ~~to the proximal end of the at least one additional tube section;~~ and
- e. a first conductive lead electrically connected to the conductive probe, said first conductive lead being attached to the outside of the at least one additional tube section.

6. (Amended). The improved telescoping stun gun of claim [5] 1 further comprising a second conductive lead electrically connected to ~~the output of the step-up circuit~~ conductive probe, said second conductive lead being placed along the ~~length of the exterior of the at least one additional tube section~~ first tube section.

7. (Amended). The improved telescoping stun gun of claim [5] 1 wherein the conductive probe is electrically connected to the output of the step-up circuit through the first conductive lead.

10. (Amended). An improved telescoping stun gun comprising:

- a. a first tube section having a base section and a distal end, said first tube section comprising a power source electrically connected to a voltage step-up circuit having an output of stepped-up voltage relative to the power source;
- b. ~~at least one additional tube section having a proximal end and a distal end and being disposed within the first tube section, and having a connection means to connect to the first tube section, said distal end comprising an conductive probe electrically connected to the output of the step-up circuit, said probe for delivering a high-voltage shock~~ at least one additional tube section having a proximal end and a distal end and being disposed within the first tube section said distal end comprising a conductive probe electrically connected to the output of the step-up circuit, said probe for delivering a high-voltage shock, said proximal end of said at least one additional tube section having a diameter that is larger than the diameter of the distal end of the first tube section;

~~d. deployment means to extend said at least one additional tube section from its position as being disposed within the first tube section to an extended position whereby the connection means connects the distal end of the first tube section to the proximal end of the at least one additional tube section;~~

c. deployment means to extend said at least one additional tube section from its position as being disposed within the first tube section to an extended position whereby, when in the extended position, the proximal end of the at least one additional tube section frictionally connects to the distal end of the first tube section;

d. a first conductive lead electrically connected to the probe, said first conductive lead attached to the outside of the at least one additional tube section.

12. (Amended). The improved telescoping stun gun of claim [11] 10 further comprising a second conductive lead electrically connected to the ~~output of the step-up circuit~~ conductive probe, said second conductive lead being placed along the ~~length of~~ exterior of the first ~~at least one additional~~ tube section.

13. (Amended). The improved telescoping stun gun of claim [11] 10 wherein the conductive probe is electrically connected to the output of the step-up circuit through the first conductive lead.

19. (Amended). An improved telescoping stun gun comprising:

- a. a first tube section having a base section and a distal end;
- b. at least one additional tube section having a proximal end and a distal end and being disposed within the first tube section, ~~and having a connection means to connect to the first tube section;~~ said at least one additional tube section comprising a

power source electrically connected to a voltage step-up circuit having an output of stepped-up voltage relative to the power source, said distal end comprising [an] a conductive probe electrically connected to the output of the step-up circuit, said probe for delivering a high-voltage shock;

c. said proximal end of said at least one additional tube section having a diameter that is larger than the diameter of the distal end of the first tube section;

d. ~~deployment means to extend said at least one additional tube section from its position as being disposed within the first tube section to an extended position whereby the connection means connects the distal end of the first tube section to the proximal end of the at least one additional tube section~~ deployment means to extend said at least one additional tube section from its position as being disposed within the first tube section to an extended position whereby, when in the extended position, the proximal end of the at least one additional tube section frictionally connects to the distal end of the first tube section; and

e. a first conductive lead electrically connected to the conductive probe, said first conductive lead attached to the outside of the at least one additional tube section.

Please add the following claims:

20. (New). The improved telescoping stun gun of Claim 1 wherein the stun gun is connected to a riot shield.

21. (New). The improved telescoping stun gun of Claim 20 wherein the handle of the stun gun is rotatably mounted to the riot shield.

Attached herewith is the Claims Listing showing the claims without edit notation.
